We recommend a 4 treatment lawn application program as follows: (Recommended by Ohio Lawn Care Assoc. and The Ohio State University) if you choose only 1 treatment Round II is recommended. Additional recommended services are as marked with *.

Round I – March 15 thru April 7: Weather, climatic conditions dictate application: Balanced granular fertilizer with crabgrass control.

Round II –April 23 thru May 15: Balanced granular, fertilizer, with a 2nd round of crabgrass control and broadleaf weed control will be sprayed for maximum effectiveness.

*Surface insect control and grub control.

Round III – August 20- September 7: Balanced granular fertilizer high phosphorus and potassium to encourage, root growth in early Fall and broadleaf weed control. Cost:

* Recommended at this time is core aeration.

Round IV – October 15- October 30: Balanced granular fertilizer and spraying of broadleaf weed.

Lawn mowing: 1st and last cuts will be maintained at 2 ½” All cuttings thereafter should be at 3”. The service will include trimming of all area along walks, curbs, fences, planting area. All driveways and side walks blown off after each cutting.

Shrub Pruning: 1st Trimming June-July or upon request and 2nd Trimming August-September or upon request. A combination of trimming and pruning will be performed upon the customer’s request. This process varies in accordance with the customer’s desire or the look the customer wants maintained. Trimming will be done to maintain a desired plant shape. Pruning will be done for the purpose of regeneration of new plant development.

Spring Clean-up: All debris accumulated over the winter will be removed from the lawn area, flower beds and decorative stone area.

Fall Clean-up: Leaves will be mulched in lawn area, removed from planting beds, flower beds, and decorative stone areas.

Bed Maintenance: This service provides a neat and weed free appearance to your planting beds. In late March or early April a granular Pre-Emergent weed control is applied to planting bed area. Throughout the season we will use post-emergent herbicide. Weekly weeding will help to maintain weed free planting beds.

Mulch: Landscape beds will be edged and mulched 2” deep with mulch of customer’s choice.

Tree treatments are offered on an as needed basis. Call for Estimate.
